## PROJECT FLOW CHART

**Job Setup:** Credit approval and signed Material Confirmation (or customer provided purchase order based on Material Confirmation).

**Submittals:** Customer provides necessary AutoCAD files and details. RoofScreen provides stamped calculations and shop drawings for approval.

**Field Measure Method:** Customer will provide field measurements for custom cutting of tube lengths for each frame (please see Field Measuring Guide for more information).

**Cut to Engineering Method:** Tubing for all frames will be cut to dimensions shown on engineering. Some field cutting may be necessary (refer to Field Measuring Guide).

**Ship Phase 1:** Includes all materials necessary to complete roof attachments and make watertight (i.e. Base Supports, Flashings, Base Cap Assemblies, etc).

**Ship Phase 2:** Includes connectors, hardware and tubing.

**Ship Phase 3:** Includes Panels, Trims and Hat Sections (if applicable). Can be shipped at same time as Phase 2 if desired.
