Spanner Plate Bulletin

Description:

The Spanner Plate allows attachment of the RoofScreen Base Support to most "2X" framed roof structures by spreading out the load over 2 or more joists, and using small diameter wood screws for the attachment.

Components:

- Plate: ASTM A36 3/8" thick sheet steel.
- Sizes: 18" to fit 16" O.C. joist spacing, and 26" to fit 24" O.C. spacing.
- Wood Screws: 10ga x 6" wood screws (6) per plate into wood structure
- Tek screws: #14 x 1 1/4" self drilling, up to (4) per Base Support into Spanner Plate

LEED Information:

Structural Components/Steel
Post Consumer Recycled Content: 33%
Post Industrial Recycled Content: 0%
Manufactured: Campbell, CA

Installation:

The Spanner Plate is fastened to the wood structure with up to (6) wood screws. The wood screws must be centered on the wood joist.

The Base Support may be mounted anywhere on the spanner plate, and attaches with up to (4) self drilling Tek Screws.
