Monumental color and protection

Architectural Powder Coatings
Color Guide
A full line of tough, durable and colorful architectural extrusion and panel coatings

PPG’s full line of advanced powder coatings offer a combination of performance and value for virtually any architectural application. PPG makes four brands of architectural powder coatings that, together, cover all three major AAMA performance specifications for architectural coatings.

* Coraflon and Environ coatings are available with liquid and powder primers for severe environments.

**Environ 03 Durable Polyester Powder**

With a durable polyester formulation that meets AAMA 2603 specifications, Environ 03 powder coatings are available in a broad range of solid colors, mica and metallic pigments, and textured finishes, making them ideal for aluminum residential window and door frames, railings, trim, and interior applications. The coatings provide good film integrity, impact and mar resistance, and color control.

**Environ 04 Ultra-Durable Polyester Powder**

Environ 04 ultra-durable powder coatings use a more robust resin and pigment system than Environ 03 coatings, meeting AAMA 2604 specifications in a wide range of colors, glosses, and mica and metallic effects. The added durability makes them an excellent choice for high-end residential and light commercial buildings with high-traffic environments.

**Coraflon FEVE Fluoropolymer Powder**

Coraflon powder coatings are formulated to provide exceptional UV durability, colorfastness, and gloss retention. Available in satin and high-luster glosses, including solids and micas, Coraflon powder coatings have the unique ability to adhere directly to metal as a one-coat paint system or as a two-coat system with a primer for harsh environments. Coraflon coatings make an excellent choice for curtain walls, storefronts, and other highly visible, high-end monumental applications.

**Duranar 70° PVDF Fluoropolymer Powder**

The renowned Duranar line of coatings are now available in a powder formulation, offering unparalleled resilience on storefronts, curtain walls, windows and louvers in a wide range of earth-tone solid colors. Our highest performing product always utilizes a liquid or powder primer, making it the best choice for severe seacoast environments. The coating is chemically inert, offering exceptional resistance to chemical attack and surface damage caused by acid rain, salt, mortar deposits, humidity, and graffiti — all while retaining color and gloss over decades of weather exposure.

Color and styling services
PPG has a growing inventory of over 300,000 color formulations and a global staff of color and design experts. All 60 colors on this color card are stocked and available on request.

To learn more about how to make PPG your single-source supplier of architectural powder coatings or to order color cards, literature or sample panels, please visit requestppg.com or call 800-258-6398.

A global partner
PPG is a preeminent supplier of coatings solutions. Through global leadership in innovation, sustainability and color, we help customers in the automotive, aerospace, industrial and construction segments to enhance more surfaces in more ways than any other company. Founded in 1883, PPG has its global headquarters in Pittsburgh, Pennsylvania and operates in more than 70 countries around the world.

Our global manufacturing and product development capabilities ensure that coatings can be manufactured cost-effectively and consistently almost anywhere in the world. We have strategic locations throughout North America, South America, Europe and the Asia/Pacific region, each staffed with knowledgeable sales, technical and manufacturing personnel trained in multiple coating technologies.
